CONNECTING TO THE FUTURE

We're living in explosive times with a lot of complex challenges and opportunities. Decisions need to be taken urgently. Luckily we found a source that shares some information on the future with us. But the connection to the source was instable, the information remains incomplete.

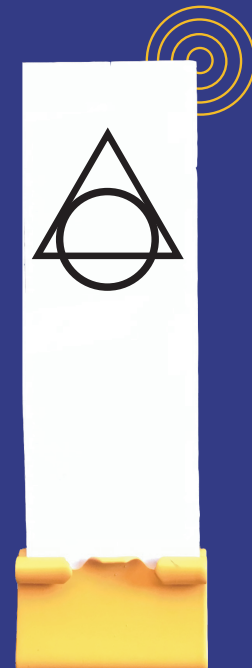

For this reason we need to gather a team of experts in order to succeed the mission – complete the missing information of the future to find better approaches in the present.

**LINK** is a creative foresight board game for up to 6 players.

In the first phase of each round the players use their expertise to complete the missing information and create different scenarios (on the future).

After a short reflection the players decide in a second phase whether the scenario is a desired one or should be avoided. With this scenario in mind, the players go back to the present and create approaches in order to tackle this future development.

THIS GAME CAN BE PLAYED ON ANY TOPIC RELATED TO FUTURE AND IT CAN ALSO BE CUSTOMIZED TO THE FIELD YOU'RE WORKING ON. IF YOU'RE INTERESTED AND WANT TO TRY OUT THE GAME DON'T HESITATE TO GET IN TOUCH.
